

VIDATH HARSHITHA

Information Technology Undergraduate | SLIIT

Profile

Aspiring Full-Stack Developer and UI/UX enthusiast with strong skills in frontend and backend development using JavaScript, MERN Stack, Java, PHP, Python, Kotlin, SQL and MongoDB. Passionate about QA engineering with hands-on experience in Selenium automation testing. Proficient in writing test cases, identifying bugs, and improving software quality. Strong communicator and team player with a proactive mindset and a passion for building user-friendly digital solutions.

Education

(2023-2027)
SLIIT University
BSc (Hons) in IT Specialized
Current CGPA : 3.28
Deans List: Year 01 Semester 01

(2008-2022)
Lyceum International School Wattala

G.C.E. Advanced Level 2022 :
Physical Science Stream including
Combined Maths, Physics, Information
Technology

G.C.E. Ordinary Level 2019
(Achieved all subjects passed)

Soft Skills

- Organized
- Team work
- Time Management
- Meeting deadlines
- Critical thinking
- Positive thinking

Projects

● Automated Pet Care Clinic Management and Appointment Scheduling System (Mern Stack Project)

Developed a comprehensive web-based platform that enables pet owners to maintain digital profiles with active medical tags and book context-aware appointments. It features a secure administrative dashboard that handles dynamic appointment lifecycles, doctor assignment filtering by specialty, and backend conflict-checking logic to manage real-time doctor availability and eliminate double-bookings.

Github Link:- <https://github.com/Harshavidath12/Pet-Pulse>

● Luxury Timepiece E-Commerce and Inventory Management Platform (Mern Stack Project)

Built a platform that allows users to choose timepiece catalogs across dedicated categories, a secure checkout flow with automated invoice notifications, and a live order tracking dashboard and an admin management and inventory management.

Github Link:- <https://github.com/Harshavidath12/New-Jayarathna-watches>

● Student Accommodation and Roommate Matching Platform (Mern Stack Project)

Platform that allows housing search and boarding experience for university students. Built using the MERN stack, the platform automates listing management for landlords, incorporates a preference-based roommate matching system, and integrates the Google Maps API for dynamic real-time location visualization and advanced map-based filtering.

Github Link:- <https://github.com/Harshavidath12/Acadome>

● Campus Resource Management and Reservation Platform

(Spring Boot Project)

Developed a collaborative full-stack web application designed to centralize and automate the management of campus facilities, lecture halls, and laboratory equipment. Built using Spring Boot and React with a PostgreSQL database, the system features a smart reservation engine with scheduling validations to eliminate booking overlaps, an integrated maintenance ticketing mechanism, and secure role-based access control with OAuth authentication.

Github Link:- <https://github.com/Harshavidath12/it3030-paf-2026-smart-campus-group137>

● Online Cinema Hall and LED Board Booking System

(Mern stack Project)

Developed a comprehensive web-based platform designed to dual-manage physical media asset rentals and entertainment space advertising. Built using the MERN stack, the system digitizes core booking pipelines for commercial LED board rentals and local cinema hall advertising slots. It integrates central business operations—including real-time hardware product tracking, dynamic inventory control grids and payment management.

Github Link:- <https://github.com/Harshavidath12/D-and-S-Creations>

● AgriTech – Peer-to-Peer Smart Farming Equipment Marketplace

(Mern stack Project)

Designed to centralize and automate agricultural machinery rentals for smallholder farmers. Integrated with the Google Maps API, the system features a geospatial search engine for radius-based equipment filtering, a conflict-free booking engine with automated date-range validations, a secure checkout pipeline for upfront security deposits, and a role-based reactive notification system.

Github Link:- <https://github.com/Harshavidath12/AgriTech>

● Habit Tracker Mobile App

(Kotlin/XML)

Developed a habit tracker mobile app featuring core functionalities such as adding, updating, and deleting daily habits, along with a hydration reminder that notifies users to drink water and tracks their daily water intake.

Technical Skills

- Java
- Javascript
- PHP
- Tailwind CSS
- SQL
- MongoDB
- Mern
- Python
- React.js
- Node.js
- Express.js
- Kotlin
- PostgreSQL
- Laravel

VIDATH HARSHITHA

INTERN-SOFTWARE ENGINEER

23rd June 2026.

The HR Manager,

Dear Sir/Madam,

Application for the position of Intern-Software Engineer

I am writing to express my interest in Software Engineering Internship opportunities that may be available within your organization. I am currently a third-year Software Engineering undergraduate at Sri Lanka Institute of Information Technology (SLIIT) with a current CGPA of 3.28.

Throughout my academic journey, I have developed a strong foundation in software development, programming, database management, and problem-solving. I was honored to be included on the Dean's List for my academic performance and am working towards achieving this recognition again. In addition, I have successfully completed several academic and personal projects that have strengthened my technical skills and ability to work collaboratively in a team environment.

I am eager to gain practical industry experience and apply the knowledge I have acquired through my studies. I am particularly interested in opportunities that allow me to contribute to real-world software development projects while learning from experienced professionals. I am confident that my academic background, dedication to learning, and passion for software engineering would make me a valuable addition to your team. I have attached my CV for your review and would welcome the opportunity to discuss my qualifications further. Thank you for your time and consideration. I look forward to hearing from you.

Yours sincerely,

Vidath Harshitha

03rd-Year Software Engineering Undergraduate

Sri Lanka Institute Of Information Technology
