

VIDATH HARSHITHA

KADUWELA - SRI LANKA

 +94-706-625-728  harshithavidath@gmail.com  Harshavidath12  Vidath Harshitha  Portfolio

OBJECTIVE

Aspiring Full-Stack Developer and UI/UX enthusiast with strong skills in frontend and backend development using JavaScript, MERN Stack, TALL Stack, Java, PHP, Python, Kotlin, SQL. Passionate about QA engineering with hands-on experience in Selenium automation testing. Proficient in writing test cases, identifying bugs, and improving software quality. Strong communicator and team player with a proactive mindset and a passion for building user-friendly digital solutions.

EDUCATION

- Sri Lanka Institute of Information Technology (SLIIT), Malabe 2023 – Expected 2027
BSc (Hons) Information Technology (Undergraduate) Sri Lanka
 - Currently in 3rd Year
- Lyceum International School-Wattala 2007 – 2022
G.C.E. Advanced Level (2022) & G.C.E. Ordinary Level (2019) Sri Lanka
 - A/L Stream: Physical Science
 - Subjects: Combined Mathematics (C), ICT (B), Physics (S)

PROJECTS

- Automated Pet Care Clinic Management and Appointment Scheduling System 
(Mern Stack Project)
Developed a comprehensive web-based platform that enables pet owners to maintain digital profiles with active medical tags and book context-aware appointments. It features a secure administrative dashboard that handles dynamic appointment lifecycles, doctor assignment filtering by specialty, and backend conflict-checking logic to manage real-time doctor availability and eliminate double-bookings.
- AgriTech – Peer-to-Peer Smart Farming Equipment Marketplace 
(Mern Stack Project)
Designed to centralize and automate agricultural machinery rentals for smallholder farmers. Integrated with the Google Maps API, the system features a geospatial search engine for radius-based equipment filtering, a conflict-free booking engine with automated date-range validations, a secure checkout pipeline for upfront security deposits, and a role-based reactive notification system.
- Luxury Timepiece E-Commerce and Inventory Management Platform 
(Mern Stack Project)
BUILT a platform that allows users to choose timepiece catalogs across dedicated categories, a secure checkout flow with automated invoice notifications, and a live order tracking dashboard and an admin management and inventory management.
- Finance Tracker 
(Laravel / Alpine.js Project)
Designed to streamline personal capital management through real-time financial tracking and dynamic data visualization. Features fluid, Alpine-powered single-page interactivity for instant ledger updates, reactive budget limit guardrails with visual status warnings, and interactive charting for category expense distributions. Engineered with a transaction-safe Laravel core using relational database schemas, strict decimal data validation, and secure Laravel Sanctum session authentication.

- Campus Resource Management and Reservation Platform -(Group Project)
(Spring Boot Project)
- As the group leader, I designed and developed the authentication and authorization module of the campus facility management system, implementing secure OAuth-based Google Sign-In and role-based access control to ensure protected user access. Additionally, I developed the real-time notification handling component, enabling users to receive instant updates regarding reservations, maintenance requests, and system activities.
- 

- Student Accommodation and Roommate Matching Platform -(Group Project)
(Mern Stack Project)
- As the group leader, I managed the team and coordinated the development of a student housing platform. I developed an advanced accommodation search system using the Google Maps API to provide real-time location mapping and map-based filtering. Additionally, I designed and built a smart roommate matching algorithm to help university students find compatible roommates based on their personal preferences and requirements.
- 

- Task Management Dashboard
(Laravel / Alpine.js Project)
- Built a responsive, real-time Task Management Dashboard using a Laravel backend and a MySQL database. Utilizing Alpine.js for lightweight frontend reactivity, the platform delivers fluid, single-page interactivity—such as instant task creation modals and live filtering—completely without page refreshes.
- 

SKILLS

- **ProgrammingLanguages:** Java, JavaScript, TypeScript, C#, Python, PHP, Kotlin
- **FrontendDevelopment:** React.js, HTML5, Tailwind CSS , Alpine.js
- **BackendDevelopment:** Node.js, Express.js, Spring Boot, ASP.NET, Laravel
- **DatabaseTechnologies:** MongoDB, PostgreSQL, MySQL
- **Authentication&Security:** JWT Authentication, bcrypt Password Hashing,
- **Tools&Platforms:** Git, GitHub, VS Code, Visual Studio, Postman, MySQL Workbench, XAMPP, Eclipse
- **SoftwareEngineeringConcepts:** Object-Oriented Programming (OOP), Data Structures & Algorithms, CRUD

Special Achievements

Dean’s List Award in the Academic year 2024 - (SLIIT)

Certified in Mongo DB Data Modelling Path

VIDATH HARSHITHA

INTERN-FULL STACK DEVELOPER

27th June 2026.

The HR Manager

Dear Sir/Madam,

Application for the position of Intern-Full Stack Developer

I am writing to express my interest in Full Stack Development Internship opportunities available within your organization. I am currently a third-year Information Technology undergraduate at Sri Lanka Institute of Information Technology (SLIIT) with a current CGPA of 3.28.

Throughout my academic journey, I have developed a strong foundation in software development, programming and database management. I was honored to be included on the Dean's List for my academic performance and am working towards achieving this recognition again. In addition, I have successfully completed several academic and personal projects that have strengthened my technical skills and ability to work collaboratively in a team environment.

I am eager to gain practical industry experience and apply the knowledge I have acquired through my studies. I am particularly interested in opportunities that allow me to contribute to real-world software development projects while learning from experienced professionals. I am confident that my academic background, dedication to learning, and passion for software engineering would make me a valuable addition to your team. I have attached my curriculum vitae for your review and would welcome the opportunity to discuss my qualifications further.

Thank you for your time and consideration. I look forward to hearing from you.

Yours sincerely,

Vidath Harshitha

03rd-Year Information Technology Undergraduate

Sri Lanka Institute Of Information Technology
